

To whom it might concern

Francisco Javier Prieto created my website

<https://intepsicologiabilbao.es/>

It was part of his Vocational Training practices in 2017, and since then he has also been in charge of maintaining it.

Francisco has always been interested in giving me the best possible experience, making my usage of the web as easy and intuitive as possible, even creating a custom user manual for me.

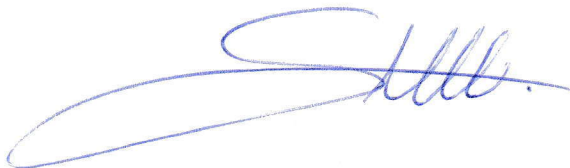

He is a person who is 100% involved in what he does, works hard, and investigates possibilities to improve or fix any problems a project may have.

I have observed that he always looks for the best for the client. In addition, he is empathetic, intelligent, constant, assertive, generous, active, creative, has the capacity to learn, is educated, communicative, and knows how to listen. The interview prior to the creation of the website was very productive and I saw his involvement in the project.

He also pays a lot of attention to small details, he puts himself both in my place and in the place of web users when designing or programming something. And if something gives problems, it is capable of adapting and looking for a solution.

His ultimate goal is to make the customer happy.

Therefore, I recommend Francisco for any related work.
